

AIMS' Interim Report Card for Saskatchewan High Schools

As an interim report, we invite parents, students and teachers to review the information and make comments, particularly if they feel there is information missing that should be included. The object is to provide as much information as possible about what goes on inside our classrooms, so that we can use that information to improve student performance.

Below please find links to the information available for your high school. There is also a link to the overview paper explaining the methodology and why public reporting of this information is important.

For ease of viewing, we have divided the report card for Saskatchewan's high schools in PDF files, listed alphabetically by the first name of the school.
