

# Fourth Annual Report Card on Atlantic Canadian High Schools

If we want to make our schools better, we have to know what their individual strengths and weaknesses are, based on real verifiable data; we have to know how they perform compared to each other, so that we can see who is to be emulated and who needs help.

This is the fourth annual report card on Atlantic Canadian high schools (RC4). It is based on a three-year average including 2001/02, 2002/03, and 2003/04.

The final grade and rank for the third annual report card (RC3) is included for reference. The grades reported here are for the schools themselves and are not simply an average of grades received by the students at that school.

## Inputs

Inputs are the factors outside of the school's control that could potentially influence school performance. We have secured data on four such measures:

- **HS Enrolment** – the number of students enrolled in high school grades.
- **PTR** – the ratio of all students to full-time equivalent teaching staff.
- **SES** – the socio-economic status uses a number of measures to capture the social and economic conditions of the school's catchment area.
- **Feeder achievement** – an indicator of the performance of junior high or middle school students who go on to attend each high school.

## Outcomes

Outcomes are divided into two broad categories: absolute and contextual. For the absolute grade, each school is assessed relative to the rest of the schools in the province. For the contextual grade, each school is assessed against the reasonable expectations of a school with similar inputs.

**Final grade** is calculated by averaging the overall absolute grade and the overall contextual grade.

Schools for which we were *not able to secure a complete data set* are not given a final overall rank and are listed alphabetically as *unranked*.

All *available* results, as well as table notes that provide further explanation on the measurements and data, will be posted online at [www.aims.ca](http://www.aims.ca).

## The Research Team

Principal researcher Rick Audas is an Assistant Professor in the Division of Community Health, Faculty of Medicine, Memorial University of Newfoundland. Co-author Charles Cirtwill is Vice President and Director of Operations at AIMS, as well as the head of the Institute's Education and School Reform Project. Lisa Savoie, AIMS Operations Coordinator, provided vital assistance in compiling the data and the grades themselves.

## Academic Engagement

This is an indicator of the level of student engagement in academics calculated by averaging attendance rate, moving-on rates, post-secondary preparation in both math and language arts, and post-secondary participation.

- **Attendance:** Where available, the attendance rate of high school students.
- **Moving-on:** Based on the number of students who move from one grade to the next grade. The Grade 12 moving-on rate is calculated by dividing the number of graduating students by the number enrolled at the beginning of the year.
- **Post-secondary preparation:** Where available, the proportion of students participating in college preparatory math and language arts courses.
- **Post-secondary participation:** Where available, the proportion of students moving on, or intending to move on, to post-secondary education the year after graduation.

## Academic Achievement

This is an indicator of overall academic success calculated by averaging school marks in math, science, language arts, and humanities courses, provincial exams in the corresponding courses, and post-secondary achievement.

- **School marks:** Where available, the average teacher-assigned grades for general, academic and advanced level courses in math, science, language arts and humanities.
- **Provincial exams:** Where available, the average grade on provincial exams including math, science, language arts and humanities.
- **Post-secondary achievement:** Is based on the comparative academic success of Atlantic Canadian first year post-secondary students attending 18 Atlantic Canadian universities and community colleges.

# New Brunswick - Anglophone

**IBM has the world's largest IT research organization, with about 3,000 scientists and engineers working at eight labs in six countries.**

*"IBM Research is the new standard for customer collaboration to which serious technology vendors will be held. It is extraordinary, it is risky as hell, it is brilliant and it is the future."*  
- Information Week

Analyzing advanced technologies to rapidly commercialize science and invention.

That's IBM Innovation.

That's IBM Research.

Call us.
